

Project № B2.9a.10 "Strengthening primary Medical care in Isolated and deprived cross-border arEas (Smile)" is co-funded by the European Regional Development Fund (ERDF) and by national funds of the countries participating in INTERREG V-A "Greece-Bulgaria 2014-2020"Cooperation Programme

Deliverable 1.3.3 Project Coordination Meetings

Organization of one (1) partners' technical meeting at Ardino (2nd Project Meeting)

On June 27, 2018, was organized a partner's meeting in Ardino with participation of the partners from Greece and Bulgaria. Main topics of the meeting included:

- Status reporting with regards to the procurement & contracting procedures so far
- Monitoring and follow-up of the activities implemented so far by each partner
- Agreement on a joint action plan for the period July-December 2018
- Specialization of the project communication strategy and tools

1

To:

- Mr. Efstratios Plomaritis, Director of 4th Health District of Macedonia Thrace (LB & PB 1)
- Mr. Theodore Laopoulos, Vice Rector for Research and Coordination of AUTH (PB 2)
- Mrs. Maria Kirkova, Mayor of Municipality of Harmanli (PB 4)
- Mr. Konstantinos Karakatsianopoulos, President of National Emergency Aid Center (PB 5)
- Ms. Kiriaki Antoniadou, Project Officer, JS

14 June 2018, Ardino

INVITATION

for participation in the second Project Partners' Meeting of Project " Smile" on 27 June 2018 (Wednesday) at the Meeting room of the Ardino Munipal Council at address: town of Ardino, 31, Beli brezi Blvd., Bulgaria

Dear Project Partners,

Hereby, I take the pleasure to invite you to attend our second Project Partners' Meeting under project "Strengthening primary medical care in isolated and deprived cross-border areas" (Smile), funded by the INTERREG V-A "Greece-Bulgaria 2014-2020" Cooperation Programme. It will take place on 27 June 2018 from 11.00 am till 2.45 pm at the Meeting room of the Ardino Munipal Council at address: town of Ardino, 31, Beli brezi Blvd.

Please find attached the agenda. A press conference with representatives of the partners is envisaged during the partners meeting. After its closure, from 3 pm we organise a celebration of the 60th anniversary from the opening of Multi-profile Hospital for Active Treatment of Ardino, which you are also invited to attend.

We shall appreciate if you could confirm till 25 June 2018 the names and positions of the representatives of your organisations who will participate in the meeting.

We shall be looking forward to seeing you in Ardino!

Attachment: Agenda of the second Project Partners' Meeting

Best regards,

Dr. Guner Osman Director Multi-profile Hospital for Active Treatment of Ardino (PB 3)

2nd Project Meeting Agenda

English

Main topics of the agenda

- Welcome & introduction speeches by Mr. Resmi Murad, Mayor of Ardino Municipality and by Dr. Guner Osman, Director of the Multi-profile Hospital for Active Treatment of Ardino
- > Partners' status reports presentation
- Presentation of the roadmap for the implementation of Work Package 4 "Studies to improve PHC services in CB area"
- Presentation of the roadmap for the implementation of Work Package 5 "PHC practitioners' capacity building"
- Presentation of the roadmap for the implementation of Work Package 6 "Citizens' oriented PHC Governance Plan"
- > Presentation of the project communication strategy and target groups to address
- > Partners tasks related to the project management & reporting
- > Organisation of a Press conference with representatives of the project partners
- > Evaluation of the project meeting & approval of the 2nd project meeting minutes
- > Scheduling of the next project meeting

Welcome & Introduction Speeches

Mr. Resmi Murad, Mayor of Ardino Municipality and by Dr. Guner Osman, Director of the Multi-profile Hospital for Active Treatment of Ardino (PB3) greeted the participants and highlighted the importance of the project for the local community. The organization of the present partners' meeting coincides with the 60th anniversary from the opening of Multi Profile Hospital for Active Treatment of Ardino, which is a well-established and reputable healthcare institution providing primary healthcare services to 3 municipalities from the region and a population of over 30,000 people. Therefore, the activities under the current project will significantly enhance the hospital's capacity to provide better services.

Partners' status reports presentation

Each of the five project partners provided brief information on the procurement & contracting procedures, as well as on the implementation of the WPs and Deliverables. None of the partners indicated possible difficulties or addressed specific issues, which might hamper the project implementation.

Presentation of Work Package 4 "Studies to improve PHC services in CB area"

The representative of the Aristotle University of Thessaloniki - Department of Civil Engineering presented the specific tasks to be accomplished and deliverables to be prepared by each partner as well as the time schedule for implementation of the WP in the semester July-December 2018.

Presentation of Work Package 5 "PHC practitioners' capacity building"

The representative of the Aristotle University of Thessaloniki - Department of Medicine presented the specific tasks to be accomplished and deliverables to be prepared by each partner as well as the time schedule for implementation of the WP in the semester July-December 2018.

Presentation of Work Package 6 "Citizens' oriented PHC Governance Plan"

The representative of the 4th Health District of Macedonia & Thrace presented the specific tasks to be accomplished and deliverables to be prepared by each partner as well as the time schedule for implementation of the WP in the semester July-December 2018.

Presentation of the project communication strategy and target groups to address

Mrs. Papaioannou made a detailed presentation of the project communication strategy and presented the designs of the materials that will be produced under the project, to be sent to all project partners and used as templates.

Partners tasks related to the project management & reporting

The LB informed the project partners that the next progress report has to be submitted to the JS by 20 July 2018. Therefore, all PBs are requested to send their individual progress reports by 16 July 2018.

Organisation of a press conference with representatives of the project partners

A press conference with representatives of the project partners was organized informing the local media about the nature of the project, its objectives and activities, as well as the expected outputs and major impacts on the target groups.

Evaluation of the project meeting & approval of the 2nd project meeting minutes

The project manager Mrs. Makryalea invited all partners to complete the evaluation form of the meeting. Closing the meeting all partners approved the minutes and agreed that they would meet in person in the next technical meeting at the end of 2018.

Accompanying documents

- > Invitation & agenda of the meeting
- Project meeting presentations
- Signed participants' lists
- > Evaluation forms and summary of feedback from participants
- > Photos from the meeting

Progress of the procurement & contracting procedures

- Stenders (open public & open accelerated) and 2 calls for expression of interest of a total value of 382.500,00€ have been already procured <u>98% of the budget to be procured</u>
- Sontracts of a total value of 92.500,00€ have been already signed 24% of the budget to be contracted
- I more contract of a total value of 226.500,00€ will be signed in July 2018, <u>59% of the budget to be contracted</u>

83% of LP's budget will be contracted in the end of July 2018

Activities & deliverables implementation progress so far

January 2018

- Project & Quality Assurance Plan
- February 2018
- ☑ 1st Progress Report/ Feb 2018
- ☑ Kick off meeting/ Feb 2018
- <u>June 2018</u>
- ☑ Draft versions of the project logo & slogan, info material basic (infokit & banners) etc.

Difficulties and issues

- "ZERO" paid out expenses within the 1st Reporting Period (Oct-Dec 2017) for all the project partners
- "ZERO" paid out expenses will be also reported for LP for the current (2nd) Reporting Period (Jan-Jun 2018), due to:
 - the contractual provisions for payments only after the final delivery of the equipment

Estimating that the final delivery of the equipment included in the first two contracts will take place in July 2018, the first payment of a total amount of 22.300,00€ will be executed also in July 2018.

- the delays within the selection procedure for the services contract (total amount of 70.200,00€)
- Delays in the launch of the basic communication activities (project communication strategy development, opening event, website etc.) due to the delay of the service contact award

Given that service contract is about to be signed in the next 10 days (the announcement of the temporary contractor has been already communicated), the basic communication activities will be implemented during July 2018.

2nd Project Meeting at Ardino

THANK YOU

SMiLe

SMiLe: Strengthening primary Medical care in IsoLated and deprived cross-border arEas

2nd Project Meeting at Ardino Project communication strategy & tools

The Project is co-funded by the European Regional Development Fund and by national funds of the countries participating in the Interreg V-A "Greece-Bulgaria 2014-2020" Cooperation Programme

Increase awareness of the project's targeted audience, including patients, local population, visitors, medical staff and other interested parties in the health sector

General Communication Objectives

Ensure and enhance the transparency of the activities implemented, the use of public funding and the demostration of the role of the EU

Target groups

- General population of the two areas
- Persons with restricted mobility
- Medical practitioners all over the cross-border area
- Local and regional stakeholders and interested parties
- Local and regional authorities representatives
- Academic and scientific community as well as civil society organizations
- Local, regional and national media both general and thematic media

Information and Publicity tools and activities

Project Communication Plan and visual identity (logo & slogan; symbols, formats, colours and templates) in compliance with the Programme I&P Guidelines Trilingual project website providing info about the project idea, objectives, activities, outputs, expected results etc., as well as thematic related topics

Information material including card-postals, information kits, project banners, results' booklets Production of a 5' TV film promoting project outcomes in all partners' areas

Press releases and articles

Opening press-conferences, final events (conferences, symposium etc.) and local thematic infodays

SMiLe Project logo & slogan

Interreg Greece-Bulgaria SMile

European Regional Development Fund

"Health within reach"

Basic elements of visual ID: the project colors

The main project color is close to purple (RGB 163/98/152) that is the color of the thematic objective "Social Inclusion" in accordance with the Communication Handbook (branding) of Interreg Program

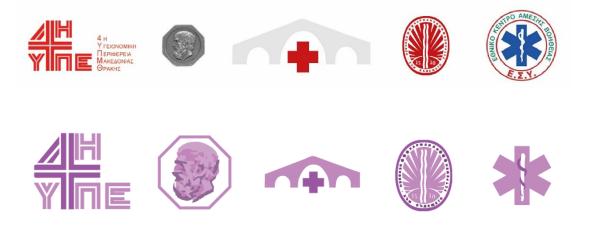

Five more additional shades close to the main color (RGB 163/98/152) have been selected in order the visual ID of the project to be further specialized and improved

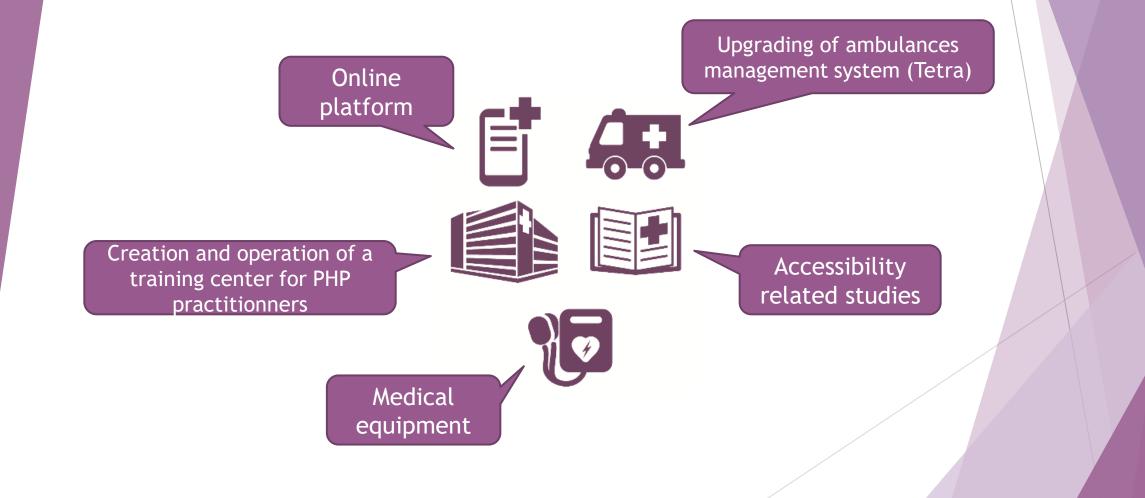

Basic elements of visual ID: the partners' logos

Instead of the official partners' logos, we propose a light transformation of them using the project's main colors in order the common design of the project to be further supported.

Basic elements of visual ID: Actions' Images

Cohesion is the key to success

- IMPORTANT NOTE: It is imperative that all the partners use the same elements of communication and visual ID at all times.
- When creating a communication material, each partner shall consult our joint communication base for:
 - Project logo and graphic elements
 - EU and ERDF references to all communication material
 - Fonts, sizes and textual references
- Before producing any material and prior to sending it to the Joint Secretariat, we suggest that partners notify LB with each designed material.

Thank you!

Project kick-off meeting WP6 Citizens' oriented PHC Governance Plan

Concept and methodology

Interreg Greece-Bulgaria SMiLe European Regional Development Fund

WP6 General Objective

to develop and implement at pilot level an evaluation model as a part of a wider health governance plan, involving citizens' and local/ regional stakeholders active in the field of health

WP6 Expected results

- Improved PHC plans developed in a community oriented approach
- Improved assessment mechanisms
- Enhanced awareness and skills of citizens in health emergencies

Interreg Greece-Bulgaria SMiLe European Regional Development Fund

WP6 Target groups & beneficiaries

- Administrative, medical and nursing staff of the health infrastructures
- Administrative, medical and nursing staff of the primary, secondary and tertiary health facilities in the cross-border area
- Health professionals (private doctors, employees in private medical centers or hospitals etc.) and other stakeholders related to health sector
- Professional, voluntary and other organisations active in the field of health
- Local and regional authorities

WP4: Studies to improve PHC services in CB area

Dr. Panagiotis Tsalis

Transport Systems Research Group, Aristotle University of Thessaloniki TSRG/ AUTh

Contents of the presentation

- Presentation of TSRG/ AUTh
- Selected projects of TSRG/ AUTh related to accessibility
- SMiLe Work Package 4
 - Inequalities in PHC provision
 - WP4 deliverables

The Transport Systems Research Group

- The Transport Systems Research Group of the Aristotle University of Thessaloniki (TSRG/AUTh) was established by in 1998.
- Functions within the Division of Transport and Project Management of the School of Civil Engineering of the Aristotle University of Thessaloniki.
- The scientific activities of the Group fall under the areas of operation, planning organization and management as well as the impact of Transport Systems on people, environment, sustainable development.

The Transport Systems Research Group

Main fields of expertise:

- Design, planning and management of Transport systems.
- People with reduced mobility (disabled, elderly, etc.) and accessibility.
- Urban and rural public transport and flexible transport services.
- Freight transport and logistics.
- Feasibility, traffic and mobility studies.
- Social impact analysis on Transport systems.
- Environmental management of Transport systems.
- New technologies and telematics in Transport.
- Transport Safety.
- Tourism and Transport.

SMiLe Work Package 4

Inequalities in PHC provision

Barriers related to health for general population tend to be exacerbated for people with disabilities. Peters et al. (2008) describe four main dimensions:

- 1. Geographical accessibility
- 2. Availability, having the right type of care to those who need it
- 3. Financial accessibility
- 4. Acceptability, the match between how responsive health service providers are to the expectations of individual users.

WP4, aspires to provide an in depth view of the existing situation and initiate actions for the **improvement of the accessibility offered by Primary Health Care centres.**

WP 4 will be based on existing methodologies developed by AUTh in the frame of research projects, research in relevant bibliography, as well as the continuous application of a version of "Delphi method" through the cooperation of the project team with involved actors, experts and citizens with disabilities.

• D 4.1 Constraints' analysis to access PHC

• D4.2 Primary Health Care infrastructure accessibility assessment

• D4.3 Pilot accessibility improvement studies

- WP4 end: 11th of October 2019

In D4.1 the obstacles that citizens with disabilities face in health provision will be examined.

- review of the published literature and reports
- identification of existing data and legislation concerning heath care provision
- assessment of policies and analysis of disparities in health care provision.

In D.4.2 the accessibility of the infrastructure offered will be assessed through a specialized methodology which will be developed

The methodology will include checklists for various elements of PHC infrastructure.

The analytical nature of the methodology will ensure that it can be used in the future by non-specialized personnel, thus providing interested stakeholders with a useful tool in order to self- assess their infrastructures and services.

The methodology developed will be utilized in the evaluation of local infrastructure in Greece as well as in Bulgaria.

In D4.3, a study for accessibility improvement of a major infrastructure of the area will be conducted.

The infrastructure to be selected will focus on the provision of Primary Health Care, probably in a rural area.

Iasmos is a town and a municipality in the Rhodope regional unit of Thrace, Greece, built on the side of the Rhodope Mountains.

The municipality lasmos was formed at the 2011 local government reform by the merger of the following 3 former municipalities, that became municipal units (Amaxades, lasmos, Sostis)

The municipality has an area of 485.285 km2, the municipal unit 221.795 km2

Methodology

The methodology includes the following checklists:

- Checklist for buildings closed spaces
- Checklist for open spaces and pedestrian routes
- Checklist for health care provision practices and policies

The checklists are quite detailed and include questions that can be easily answered by the PHC centres' employers. Thus, the proposed methodology is a necessary and useful tool for future assessment of infrastructure and policies

Interreg

SMiLe

Request Register Restaurent Part	
2.4 Services	
Services: Restrooms-General	
2.4.1 How many accessible lavatories exist in the building (to dispose at least appropriate door opening, enough space for free movement of wheelchair users, accessible toilet, accessible shower, etc.)?	
2.4.2 How are the restrooms (lavatories/toilets) distributed in the building (personnel restrooms, public restrooms, etc.)?	Give numbers for each along with the floor number and location:
2.4.3 Is there an accessible public restroom (lavatory/toilet) available at each floor?	
2.4.4 Is the accessible toilet separate or located in a restroom of common use? If located in another restroom specify type (e.g. 2nd floor personnel, etc.).	

1.2 Bridging different levels between sidewalk/walkway and road surface

General

	Yes	No	Notes
1.2.1 Is there a height difference			
along the route which is bridged with			
a ramp – dropped kerb? If yes, please			
mark it on the map.			
1.2.2 Continuity: does a ramp /			
dropped kerb exist at the opposite			
side of the road?			
1.2.3 In case there is a "safety			
island" on the road do they exist			
ramps/dropped kerbs on it?			
1.2.4 Do safety island's			
ramps/dropped kerbs correspond to			
those of the road/sidewalks?			
1.2.5 Visibility: can a pedestrian			
easily see the opposite side of the			
road?			
1.2.6 Placement: are ramps /			
dropped kerbs located where the			
pedestrians "naturally" want to cross			
the road?			
1.2.7 Do obstacles exist that restrict			
the ramp's width?			
1.2.8 Is the ramp usually occupied by			
parked vehicles?			

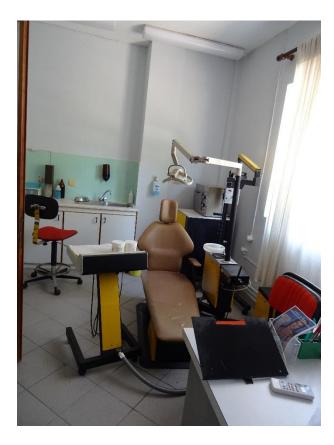

Conclusions

- The methodology was applied successfully to a small PHC unit
- The lasmos PHC centre offered basic access to disabled visitors
- Small scale interventions could lead to marked improvements
- The creation of an accessible toilet a major priority
- No particular provisions to patients with sensory disabilities

Further actions

- D 4.1 Constraints' analysis to access PHC: proposed delivery date September 2018 (involved PB2 and PB3)
- D4.2 Primary Health Care infrastructure accessibility assessment December 2018 (involved PB2 and PB3)
- Interviews with hospital employees?
- The assessment methodology for D4.2 will be sent to partners

Thank you

ПРИЕМ

2018 - 2019

По повод **60-годишния юбилей на болницата в Ардино** поздравителни адреси бяха получени от *МБАЛ* "Д-р *Атанас Дафовски*" АД – *Кърджали* и Регионалната колегия на Българския лекарски съюз (БЛС) в Кърджали.

Мениджърът на проекта от страна на водещия партньор – 4-тата здравна служба на Македония и Тракия Емилия Макриалея сподели, че предстои да бъде извършен ремонт на помещения в МБАЛ-Ардино, позволяващ предоставянето на подобрени услуги за първична медицинска помощ на пациентите. Ще бъде закупено и доставено съвременно медицинско и компютърно оборудване, както и нова мебелировка за медицинските кабинети.

За голямо съжаление не можем да честваме 60-годишния юбилей на лечебното заведение със задоволство, зашото проблемите в областта на здравеопазването не са

Q Избори 2017 Начало Реклама Малки обяви Анкети Контакти малки, заяви кметът на общината Ресми Мурад. Болницата е затруднена в изплащането на заплатите на медицинския персонал. Тези проблеми могат да бъдат решени чрез законодателни промени, които ще доведат до смекчаване на медицинския стандарт за общинските болници. Проф. д-р Елексиос Бенос от Аристотелския университет в Солун, Гърция заяви, че се радва да бъде в Ардино по повод юбилея на общинската болница и да участва в представянето на съвместния трансграничен проект. Той отбеляза, че проектът е насочен за подобряване на медицинското обслужване на хората от уязвимите групи. Болницата в Ардино чества 60-годишен юбилей

КОНТАКТИ

📕 20/06/2018 🔺 Арда нюз 🛸 Общество

последни новини

Болницата в Ардино тази година отбелязва 60- годишен юбилей. Лечебното заведение е открита през март 1958 година. От общинска администрация сьобщиха, че честването ще е на 27 юни. Преди това в 11.00 часа ще има пресконференция по трансграничен проект България-Гърция, чиято основна цел е подобряване на първичната медицинска помощ при изолирани и лишени общности в трансграничните райони.

Ръководството на болницата и община Ардино канят всички бивши и настоящи лекари, медицински сестри, акушерки, които са дали своя принос за лечението на пациентите в болницата, за присъствие.

Неврология Онкология Ревматология Ортопедия	целта му е да се подобри първичната медицинска помощ при изолирани общности в трансграничния регион. Най-много средства са отделени за болницата в Ардино. Според кмета Расми Мурад това означава много за местните хораЩе бъде доставен изцяло нов, модерен рентгенов апарат. Ще бъдат закупени и други медицински принадлежности като обзавеждане и оборудване", поясни той.
 Офталмология Педиатрия Психиатрия / Психология 	Част от дейностите по проекта вече са започнали, а изпълнението им ще продължи една година. В същото време в болницата няма достатъчно лекари. Според Мурад причината е в заложения медицински стандарт. .Този стандарт е завишен за общинските болници, бих казал излишен и ненужен, но трябва да се съобразяваме.
 Пулмология Урология и нефрология 	Това е сериозен проблем и затруднява дейността на лечебното заведение", посочи той. НОВИНИ ОТ МЕРК В община Ардино липсват и общопрактикуващи лекари. За да привлече кандидати, местната управа предлага МОВИНИ ОТ МЕРК
Уши, нос, гърло Хематология	финансови стимули. "Колкото здравната каса отпуска за неблагоприятност на съответната практика, с толкова субсидираме и ние, защото ние нямаме други критерии, по които да оценим степента на неблагоприятност на съответната медицинска практика", разясни кметът.
Имунология и алергология	Незаети лекарски практики има в цялата област Кърджали. Като причина се посочва нежеланието на медиците да работят в изолирани и труднодостъпни терени и с население, част от което не е здравно осигурено.
Обществено здраве
